

Python Internship Task 2 - Expense Tracker Solution

Use the following Python code:

```
import csv
FILE="expenses.csv"

def add_expense():
    desc=input("Enter description: ")
    amt=float(input("Enter amount: "))
    with open(FILE,"a",newline="") as f:
        csv.writer(f).writerow([desc,amt])
    print("Expense added!")

def view_expenses():
    total=0
    try:
        with open(FILE,"r") as f:
            for row in csv.reader(f):
                if row:
                    print(row[0], row[1])
                    total+=float(row[1])
            print("Total:",total)
    except FileNotFoundError:
        print("No expenses found.")

while True:
    print("\n1.Add 2.View 3.Total 4.Exit")
    ch=input("Choice: ")
    if ch=="1": add_expense()
    elif ch in ("2","3"): view_expenses()
    elif ch=="4": break
    else: print("Invalid choice")
```
